EXPERIENCE

Self-Employed, Remote — *Freelance Software Developer*

NOVEMBER 2020 - PRESENT

Freelancing for Consumer and Small Business. I design Mock-Ups with AdobeXD then develop the product primarily with React with NextJS and Javascript. Then, host on Netlify and integrate SEO services such as Google Ads

Professional Electrical Services, Houston, TX — *Apprentice Electrician*

MAY 2022 - PRESENT

Wiring power to Commercial Businesses, engaging with Business Owners and General Contract Management on Design Plans and executing. Running power from Electrical Panels to Circuits all over job sites via Flexible conduit, pipe bending, etc.

Teleperformance, Edinburg, TX — *Customer Service Representative*

JULY 2019 - NOVEMBER 2019

Provided cable and internet customer service with Comcast through Teleperformance Communications Call Center. Customer Data entry and scheduling software for Technician Visits and occasional Sales for upscaling current or new packages.

SKILLS / START DATE

PROJECTS

Super Effective Calculator — *React Native App*

Find a Pokemon's Weakness! React Native with Typescript. The primary focus of this app was to demonstrate a clean and concise codebase with automated Git Hooks for Formating, Linting, and Testing code pre-commit.

Getcha Back (*In-Progress*)— *Full Stack React Native App*

Getcha back is a payment application for sending and receiving money from friends. The main feature is a Getcha-Back where you can start a payment schedule between two people. Technology Stack is an NX Monorepo Workspace with Expo React Native and NestJS Backend.
